**Name:** 7 Bands Portable Programmable DDS Broadband Jammers

**Model:** WF-VIP JAM7

**Features:** WF-VIP JAM7 is not only Bomb jammers, but also High Power Portable DDS Convoy Jamming System, Portable RF Jammer, Portable Bomb jammer. This jammer can implementing the most effective and reliable RF jamming technology and equipped with a fully-integrated broadband jamming system. WF-VIP JAM7 can cove all RF communication Frequencies between 20MHz to 3600MHz continuously

reliable RF jamming technology and equipped with a fully-integrated broadband jamming system. WF-VIP JAM7 can cove all RF communication Frequencies between 20MHz to 3600MHz continuously and simultaneously.

- High-power portable multi-band jammer.
- Field programmability for rapid adjustment frequency with output Watt.
- Modular construction for easy maintenance, repair and upgrade.
- Jammer up to 7 different jamming modules simultaneously, and cover up to 17 different frequency bands.
- Each module with LED display to show its working frequency, output power and etc.

- Field programmability for rapid adjustment frequency with output watt.
- Modular construction for easy maintenance, repair and upgrade.
- Jammer up to 7 different jamming modules simultaneously, and cover up to 17 different frequency bands.
- Each module with LED display to show its working frequency, output power and etc.
- 350-400 watts total RF output power.
- Equipped with a remote control unit. The operator can ON/OFF each module through the wired remote controller.
- Fully portable trolley-type case.
- AC mains or DC power.
- External LED display to indicate the battery level.
- Designed with external backup battery input, adapted to external battery. Facilitating to change the battery timely for field use.

#### Product Details

WF-VIP JAM7, full portable multi band DDS Jamming system, is designed with a ruggedized trolley type case, light weight, highly mobility and reliance. This device is configured with 7 different jamming modules, the jamming frequency has more than 20 Bands. Jamming frequency module can be up to 350-400watt output power maximum.

The WF-VIP JAM7 is especially easy to install and operate: simply attach the selected antennas and activate the desired frequency bands. All operating controls and LED indicators are installed on the outside. The unit operates can draw power from AC mains or a suitable DC power source.

The general design of the system meets military requirements as well as international quality standards and requirements. Our industrial in-house quality management system guarantees highest quality standards in terms of performance, reliability and long-life cycles.

#### CHARACTERISTIC OF JAMMER MODULES

1. Each module is designed with three indication lights, to show Power, Run and Alarm (Antennae VSWR feedback status).

#### CHARACTERISTIC OF JAMMER MODULES

1. Each module is designed with three indication lights, to show Power, Run and Alarm (Antennae VSWR feedback status).

2. Each module is with LCD display to indicate the working frequency, output power and etc.

3. Each Module is designed with 232 Com Port and USB cable, connected to the computer. Frequency bands and output power can be adjusted, and the working status can be monitored through this software.

#### REMOTE CONTROLLER

WF-VIP JAM7 is design with a wired remote control unit, facilitating the operator to manage each module in any situation. This remote control unit can also display both internal and external battery level as well as built-in power supplies' working status.

#### DDS MODULE SOFTWARE INTERFACE

DDS software interface is quite simply. The operators just move the mouse and then he can set up working frequency bands and output power of the modules. Each module can be up to 4 channels output at most.

#### BIGGEST ADVANTAGE OF APPLICATION

WF-VIP JAM7 can be portable and vehicle mounted, which it's biggest advantage in the application. Two units of WF-VIP JAM7 can combine full frequency bands installed in the vehicle, equipped with vehicle mount antennas as required.

#### BATTERY TECHNICAL PARAMETER

s of WF-VIP JAM7 can combine full frequency bands installed in the vehicle, equipped with vehicle mount antennae as required.

#### BATTERY TECHNICAL PARAMETER

To warranty the safe operation of the equipment, Lithium Iron Phosphate battery has been selected. It is the most secure battery among the global large capacity batteries currently.

#### APPLICATION

Bomb disposal squads, VIP protection, Special Police (S.W.A.T), military security forces, bomb squads, anti-terrorism units, anti-drug units, border control units, checkpoint personnel, these types of law enforcement personnel who benefit greatly from the deployment of any of these best-in-class portable RF jamming solutions.

They can conduct the law enforcement process more effectively to reduce the chance that the criminals leak the information.

**NOTE:** All Bomb Jammers, IED Jammers, RF Signal Jammer and RCIED Jammers, including cell phone jammers and mobile phone jamming devices are sold for governmental, law enforcement and military users only.
